

ABSTRACT OF THE DISCLOSURE

A pen includes a penholder with a tip at one end and a decoration piece on the other end of the penholder. A head is pivotably connected to the decoration piece which has two striking pieces and the head is located
5 between the two striking pieces. The head is a hollow casing with an open top and at least one slot defined through the casing and communicates the open top. A decoration part is connected to the open top of the head which pivots and is hit by the two striking pieces to generate sound when using the pen. A
base member has a hole so that the pen is inserted in the hole of the base
10 member.
